

Hot Seat Steamer

Steamer designed exclusively for dining chair covers

Seickel & Sons is proud to announce a revolutionary new product for the linen finishing industry. Our patented machine is designed to remove the wrinkles from your dining chair covers and give them that fresh finished look.

The process is simple -

1. Place cover on frame
2. Slide the hold down clamp over the cover and lock into place
3. Inspect the cover to make sure seams and pleats are straight
4. Press the start button
5. When cycle completes, remove the hold down clamp.
6. Remove the cover
7. Fold or place on a hanger

For sharp pleats, touch up with an all steam iron.

If you have an existing Cissell Form finisher, this unit can replace the existing body. If you need a complete unit we make our own base unit as well.

System requirements for complete unit:

80psi steam pressure - 2bhp
120v 5amps

Patent Pending US#61,273,032
