

ALL STEAM IRON

AHP-300

Typical Features

SAFETY

- P.E.T plastic cover keeps the operator's hand cool from the iron's body heat.
- Both positions of steam-in and out valves provide free of work interference and keep the operator's arm from being burnt.

DURABILITY

- Higher quality stainless steel base protects the iron from rust and guarantees the weld-break for life time.
- The extended handle base is reinforced by double bolts to increase the strength of the safety of the handle.

RELIABILITY

- Internal structure is functionally so well designed that it generates the most smooth flow of dry steam at all times even when the boiler pressure drops considerably below 30 psi.
- Smaller size of the handle grip, color of the iron and the position of the steam valve lever liberate the operator from fatigue and surefit all for the operator's maximum comfort and user-friendly.
