

ULTRA DRY IRON SYSTEM

**Now
available
for the first
time for
sample and
design rooms...
irons with
guaranteed
dry steam.**

Seickel & Sons is pleased to introduce the “Seickel” stainless steel, self-contained, steam generating unit-complete with all steam irons. This package unit has it’s own condensate holding tank and feed pump, is completely portable and can support three all steam irons wherever dry steam is required. The simple 220-volt single-phase wiring makes this unit easy to set up and the quality of the manufacturing keeps it one the most easily maintained and advanced portable pressing stations available. The unit is available for immediate delivery, best of all; they are sold and backed by Seickel & Sons Inc. – people you can trust.

Now you can have it all – the convenience of a portable boiler, dry steam, and the reliability of Reimers, and Seickel & Sons Inc. After the overwhelming success at the 1992 Bobbin Show We’ve increased our manufacturing capabilities and now offer free demonstrations at our New York And New Jersey showrooms. So give us a call or just stop by.

Seickel & Sons Inc. – working hard to serve you better in the next millenium. The best just keeps getting better.
